

Code Factory

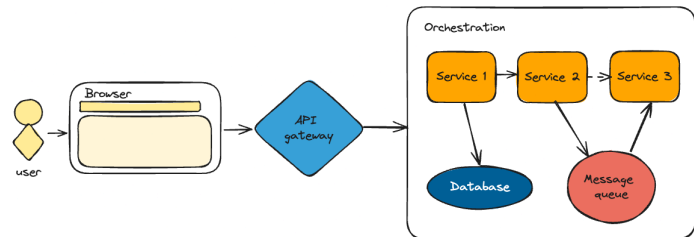

Microservice Development

Migrate your legacy applications to a modern software architecture to achieve agility and efficiency.

In today's ever-evolving digital landscape, the shift from monolithic software architectures to modern microservices is not just a trend; it's a necessity. At Code Factory, we're committed to guiding you through this transformation and helping you harness the power of cloud-native applications running on Kubernetes.

Why Microservices?

Microservices have revolutionized software development, offering flexibility, scalability, and enhanced resilience. By breaking down complex applications into smaller, manageable components, you gain agility and can adapt to changing business needs more effectively.

What we offer

Transition from Monolithic

We specialize in transitioning your existing monolithic applications into a Kubernetes-based microservices architecture.

By careful planning and execution, we minimize disruptions to your ongoing operations.

Cloud-native Applications

We help you build and optimize applications designed to thrive in cloud environments.

Embrace elasticity, high availability, and cost-efficiency.

Kubernetes Expertise

We're skilled in deploying and managing applications on Kubernetes, ensuring your microservices run seamlessly in a containerized environment.

Leverage autoscaling, load balancing, and easy maintenance.

Why Code Factory?

Innovation

Our highly skilled, certified Kubernetes experts have years of hands-on experience in designing and managing Kubernetes solutions. They are up-to-date with the latest best practices.

Scalability

We don't believe in one-size-fits-all. Our services are tailored to meet your unique requirements.

Resilience

Kubernetes can be resource-intensive if not managed properly. We help you optimize your cluster for cost savings.

Cost Efficiency

We prioritize the security of your Kubernetes clusters, ensuring your applications are safe from external threats.

Kubernetes Competence

Get peace of mind knowing that our support is just a call or message away.

Agility

As your business grows, we ensure your Kubernetes clusters scale seamlessly to meet the increased demand.

Transition to a Modern Software Architecture

At Code Factory, we're dedicated to helping you leap from monolithic to microservices and cloud-native applications. This transformation empowers your organization to be more adaptable, cost-effective, and competitive in today's fast-paced digital landscape.

About Code Factory

Code Factory was founded by young, visionary engineers with the goal of delivering cutting-edge and sustainable cloud services tailored for enterprise customers. As one of the first adopters of Kubernetes in 2015, the company was at the forefront of the technological revolution. Today, Code Factory stands out as a flexible IT services provider, bolstered by a team of certified, black-belt cloud engineers.
